PROFESSIONAL SUMMARY

Computer Science Engineering student with a **9.23 CGPA**, strong C++/Python/Java foundation, and 800+ DSA problems solved, with hands-on experience building deployed applications and data-driven systems.
Built applications spanning **frontend development, backend/API fundamentals, SQL, data processing, and ML**, with a focus on turning technical requirements into working software.

EDUCATIONS

Coimbatore Institute of Technology | Tamil Nadu, India

Aug 2024

B.E. in Computer Science and Engineering

CGPA : 9.23 / 10.00

- **B.E. in Computer Science and Engineering**, Coimbatore Institute of Technology, **CGPA: 9.23 / 10.00**

SKILLS

Tools & Platforms :	Git, GitHub, Linux, VS Code, Streamlit, Plotly, RESTful API's, Backend Services, Django, Eclipse
Databases :	MongoDB, PostgreSQL, MySQL, Redis
Frameworks & Libraries :	React.js, Pandas, NumPy, Web Audio API, Django
Programming Languages :	C, C++, Java, Python, JavaScript
Core CS :	Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS, Compiler Design

WORK EXPERIENCE

Data Science & Data Analytics Intern | Internship

May 2026 - Jun 2026

Coimbatore Institute of Technology

On-site • Coimbatore

- Generated actionable data insights by preprocessing, analyzing, visualizing, and interpreting datasets using **Python and Pandas**.
- Improved data-analysis workflows by applying structured preprocessing and analytical techniques to transform raw datasets into interpretable findings.
- Enabled clearer data-driven decision-making by translating analytical results into visual representations and concise findings.
- Strengthened analytical accuracy and consistency by applying **data-cleaning and visualization practices** throughout the analysis workflow.

Technologies / Skills Used : python, Streamlit, Tableau, scikit-learn, Pandas, Jupiter-Notebook

PROJECTS

AIRank — AI Tool Benchmark & Optimal Output Engine |  Github

Jun 2026 - Aug 2026

Individual Project

- **Achieved 85%+ top-3 recommendation accuracy** across 25 task categories using 25 Scikit-learn regression pipelines and multi-dimensional AI benchmarks.
- **Maintained $R^2 \geq 0.80$** across evaluation datasets using StandardScaler preprocessing and 3-fold cross-validation for reliable regression performance.
- **Reduced estimated tool-selection and prompt-tuning effort by 75%** with a Streamlit app for real-time scoring and task-specific prompt generation.
- **Benchmarked 15 AI tools across 25 categories** using modular data-ingestion and EDA pipelines with automated correlation and latency-performance visualizations.

Technologies / Tools Used : python, scikit-learn, Streamlit, Pandas, NumPy, Matplotlib

Influence Quality Auditor — Fake Account Detection System |  Github

Jan 2026 - Mar 2026

Individual Project

- Improved fake-account detection using **Isolation Forest**, feature engineering, and behavioral analysis to identify anomalous profile patterns.
- Accelerated profile-data processing by implementing a **multi-threaded preprocessing pipeline** for efficient handling of large-scale account datasets.
- Enabled real-time risk assessment through a **Streamlit dashboard** that visualizes account-level predictions and anomaly indicators using **Plotly**.
- Converted model predictions into actionable risk views by presenting profile anomalies through interactive dashboard visualizations for faster assessment.

Technologies / Tools Used : Python, Streamlit, Scikit-Learn, Pandas, NumPy, Plotly

Spotify Clone — Full-Stack Music Streaming Web Application |  Github

Feb 2025 - May 2025

Individual Project

- **Delivered a deployed music-streaming application** by implementing the frontend, audio playback workflow, and end-to-end deployment configuration.
- **Enabled core streaming interactions** through a custom JavaScript audio engine supporting play, pause, seeking, and queue management.
- **Improved application usability** through responsive layouts, CSS animations, and accessible streaming controls.

Technologies / Tools Used : HTML, CSS, JavaScript, Web Audio API

AWARDS & ACHIEVEMENTS

- **Ranked 1st among 50+ teams** in the Smart India Hackathon 2025 Internal Round.
- **Solved 800+ programming problems** across Data Structures, Dynamic Programming, Graphs, and system-design patterns; LeetCode 1500+ rating, CodeChef 2 $\square$, Codeforces Pupil.
- **Runner-up** in a 10-week DSA Contest conducted by the Student Development Cell.

CERTIFICATIONS

- Python Foundational Certificate — Infosys SpringBoard
- Data Analytics Job Simulation — Deloitte
- Software Engineer Intern Certificate — HackerRank
